

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

PREFACE.

THIS Work, which has been compiled with much labour, was commenced from a conviction that a publication of the kind was a desideratum in the removal of the Poor by order; and those who have been in any way concerned in that business, must be aware, that the precise name of the Parish is essential to the validity of the order, and that it is often a task of difficulty to obtain it correctly; sometimes through the ignorance of the Pauper, the name of the Parish Church is taken for that of the Parish, when it is not; and frequently from design, obstacles are raised in the way of correct information, to the great inconvenience and expense of Parishes wishing to remove, particularly in cases of suspended orders; but which difficulties and obstructions, as far as possible, it is the intention of this work to remove.

Although the chief object of this publication is to facilitate Parochial business, it will be found useful to Sheriffs, Deputy Lieutenants, Treasurers of Counties, Parochial Clergy, Gentlemen of the Law, Postmasters, &c. &c. in their correspondence and inquiries. Of course, it must be viewed merely as a work of reference, and therefore it has not the advantage of amusement to recommend it; however, the compiler trusts that its usefulness will be
sufficient

sufficient to entitle it to the indulgence and liberality of the Public.

This Work was originally thought complete without an Index; but on the suggestion of a professional gentleman, an Index is added, which will considerably aid persons referring to the work.

The areas of the several Counties are from the late Trigonometrical Survey; and the Synopsis of the Population, from the Returns laid before Parliament.

*Portsea Parish,
January 1st, 1825.*

INTRODUCTION.

IT was usual with the Romans to partition their conquests into Civitates or Districts; in the latter periods of the Roman residence in Britain, it was divided into 33 Civitates; but its more distinct division into Shires or Counties, Hundreds and Tythings, took place after Alfred had regained his throne; for the Danish invasions had so destroyed the regular habits of the inhabitants, that they were infesting each other with predatory depredations. He divided the ancient provincial divisions into Counties, and these were again divided into Hundreds, which were further sub-divided into Tenths or Tythings. Under these nominal divisions, the population of the country was arranged; every person living by means not incompatible with law, was directed to belong to some Hundred or Tenth, which was pledged to the preservation of the public peace and security of its Districts, and was made answerable for the conduct of its several inhabitants.

Parishes

A. D. 636. Parishes is ascribed by some writers to Honorius, Archbishop of Canterbury, but the distinction of Parishes could never be the model of Honorius, nor the work of any one age, but was gradually advanced by those Bishops who were the great instruments of converting the nation from the Saxon idolatry. Churches were built and endowed by Lords of Manors and others, for the use of the inhabitants of their several Manors or Districts, and consequently Parochial bounds affixed ;—the first particular distinction of one Parish from another, arose from making a property of Tithes by the Lateran Council in the reign of King John, for till then there were no Parishes distinct from one another, and no parish Priest could claim any right to the Tithes ; but by a Canon made in that Council every person is compellable to pay Tithes to the Parson or Vicar of that Parish where they arise, whereas before the Bishop of every Diocese made a distribution of them to spiritual persons, &c. It is evident that Parochial bounds were at first much larger and by degrees contracted ; for as the country grew more populous, several other Churches were founded within the extent of the former, and then a new Parochial circuit was allotted, which made such abatement to the revenues of the old Churches, that complaint was made of it in the time of Edward the Confessor ; for by the Chronicles of Stowe, he states the number of Parishes for the County of Norfolk to be 806, and the last Parliamentary Returns place them at 751 ; and in taking the number of spiritual Livings in the time of Henry VIII. it is stated that eleven more Churches formerly belonged to the City of

Norwich; but Parish bounds have returned to a settled Can. Law. medium, and are now immutably fixed upon ancient and immemorial custom, which is now observed with the most scrupulous exactness and precision, and has been produced by contended rights of Parish settlements, Assessments, Tithes, &c. &c.

Townships and Villages, or Vill, are considered as synonymous, and are most commonly the out-part of Parishes, consisting of Houses as it were separate from them; but, according to Fortescue, the boundaries of Villages are not by houses or streets, but by a circuit of ground within which there may be Hamlets, Woods, and Waste Grounds. Townships, by the 13 & 14 Car. II. are allowed to maintain their own poor, distinctly from the Parish in which they are situated; and the reason of such innovation is stated to be in consequence of the inhabitants of several of the northern counties, by reason of the largeness of the Parishes within the same, have not, and cannot reap the benefit of the 43d of Eliz. (which has been decided to 43 Eliz. embrace only Parishes). 13 & 14 Car. 2.

Chapelry is the same thing to a Chapel as a Parish to a Church, being the precincts and limits thereof.

Hamlet signifies a little village, or part of a village or parish; several country towns have Hamlets, as there may be several Hamlets in a Parish. Jac. Law Dict.

Extra-Parochial is to be out of any Parish, and where any thing is privileged and exempt from the duties of a Parish,

17 Geo. 2.
c. 37. Parish, and consists of places usually found to have been the site of religious houses, ancient castles, enclosures from the sea, reclaiming of forests, &c. The 17 Geo. II. gives a power to Justices in General Quarter Sessions to determine the allotment of improved waste and barren lands, and order their assessment to the relief of the poor, to such parish or place which lies nearest to such lands; but this shall not determine the boundaries of any parish or place, other than for the purpose of rating such lands to the relief of the poor, and other parochial rates.
